Olive tree Giant

Art. Nr. G4E_00200

- Please position the main trunk on the floor.
- Put the side trunks (all trunks are numbered!) in the open holes in the main trunk.
- Start from the top and work your way down to the lowest side trunks.
- Fix the side trunks with the enclosed screws.
- With the wood glue (enclosed) you can make the transitions from the main trunk to the side trunks smooth.
- Use the gloves enclosed to put the wood glue on desired place.
- A drop of water will make the wood glue easier to use.
- After the wood glue has dried, it will reach the same color as the trunk so that the transitions look natural.
- If you have any questions, you can always contact service@green4ever.shop
