## Ficus Exotica

Art. Nr. G4E\_00493

- Place the wooden pot on a flat surface and place the side branches neatly next to each other.
- Start by assembling the large branch on the trunk.
- Then attach the small twigs to the respective holes (twigs and main trunk holes are numbered) on the trunk and fix them to the main trunk with the supplied screws.
- With the supplied wood glue paste, the transitions from the main trunk to the branch (add a few drops of water) can be greased.
- Please use the gloves provided.
- The wood glue paste darkens after it has dried out and adapts to the color of the log.
- If you have any questions, you can always contact [service@green4ever.shop](mailto:service@green4ever.shop)
