Orange Tree Giant

Art. Nr. G4E_15998

- In your package you will find hand gloves and a special glue to fix the branches.
- Unpack the tree and the branches.
- Put the branches in the holes of the trunk (watch the numbers) and fixate them with the included screws.
- All branches have already been spread out and shaped before shipping.
- Mix some hot water with the special glue and put a thin amount on the transition point of the trunk and the branches with the gloves.
- Let it dry.
- When it is dry, it will become the same color as the trunk. The special glue needs some time to completely dry out!
- If you have any questions, you can always contact service@green4ever.shop
