Maple

Art. Nr. G4E_16094

- Start by unpacking the pallet and lay all branches and the main trunk on the ground.
- Begin by assembling the side branches in the main trunk and start with the highest branch (all side branches are numbered and must match the numbers in the main stem) and then work your way down.
- Attach the side branches with the provided screws.
- A special wood glue is included to transition between the main trunk and the side branches.
- The glue works best if you use a few drops of water, this makes the wood glue more spreadable. Use the enclosed gloves when handling the glue.
- After the glue has dried, the color will be almost the same as the wood.
- If you have any questions, you can always contact service@green4ever.shop
